Specification

1. The disclosure is objected to because of the following informalities:

Page 6, line 18, "to a that" is unclear. It seems something is missing in the phrase.

Page 7, line 1, Numeral 58 is not in the figure.

Page 8, line 1, "orifice 18" should be --orifice 22--.

Page 8, line 13, "tube like coupling 58" should be --tube like coupling 60--.

Page 9, line 6, "second tubing 26" should be --second tubing 24--.

Page 10, line 2, numeral 23 is not in the figure.

Page 11, line 8 and line 18 and also elsewhere in the specification, numeral 56 and 58 are both referring to a spray capture tube. It seems that everywhere in the specification, numeral 58 should be replaced by numeral 56.

It is noticed that the specification is replete with numerical errors in the reference numerals. Applicant is advised to thoroughly check for such errors and correct them prior to submitting the response. Appropriate correction is required.

Claim Objections

2. Claim 19 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form. Claim 19, a method claim, depends on claim 7, an apparatus claim. It seems that claim 19 should depend on claim 18.

Art Unit: 2855

Allowable Subject Matter

3. The following is a statement of reasons for the indication of allowable subject matter: Prior arts made available do not teach or fairly suggest, alone or in combination, a system for measuring dynamic forces of impacting air/water spray comprising a pitot-tube arrangement and a rain gauge arrangement. The pitot tube arrangement having a differential pressure transducer for producing a flow velocity signal and a rain gauge arrangement including a differential pressure transducer to provide signal related to the volume of water collected. A computer connected to receive the signals for indicating the magnitude of dynamic force attributed to impacting the spray.

Conclusion

4. This application is in condition for allowance except for the following formal matters as mention in paragraphs 1 and 2 of the office action.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
